

MERISIS™ PRFM (snot clot) KIT

One Step Gel Separation Technology

PRFM- Platelet Rich Fibrin Matrix

PRFM, or Platelet Rich Fibrin Matrix, is a biological substance made from peripheral blood to trigger healing and regeneration. Platelet Rich Fibrin Matrix Therapy is a promising application in the field of periodontal regeneration and can be used in clinical situations requiring rapid healing. It also provides benefits in anti aging therapy and many other regenerative applications. It merges cutting-edge technology with the body's natural ability to heal itself. Platelets contain packets of growth hormones and cytokines that trigger tissues repair, regeneration and enhance healing. When PRF is injected into the damaged area, it activates a mild inflammatory response, which triggers the healing cascade.

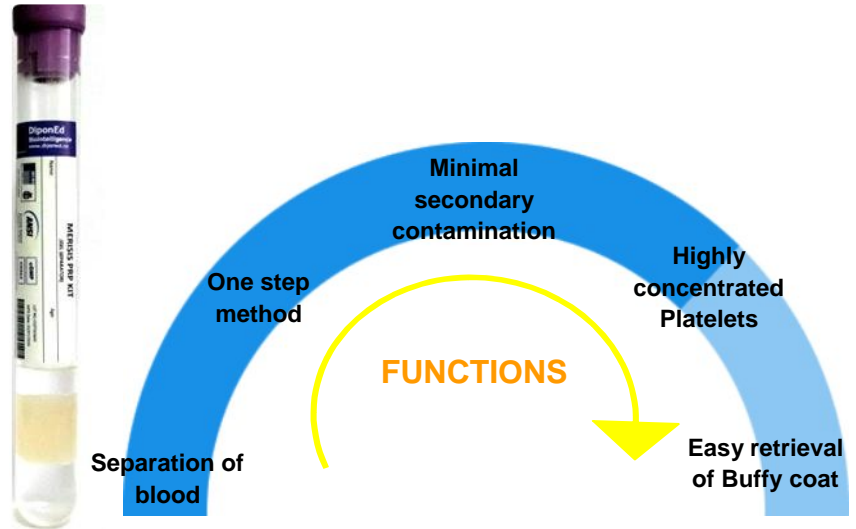

Kit Contents:

1. 13 ml tube with gel separator, blood loading capacity 10 ml
2. 1ml activator of PRFM

SCOPE OF PRFM THERAPY

- ★ Orthodontics
- ★ Periodontal regeneration
- ★ Sports injuries recovery
- ★ Anti aging (skin)
- ★ Chronic wound healing
- ★ Non healing ulcers

MERISIS™ PRFM (snot clot) Kit Product Competitiveness

- 👉 Compatible with most common clinical centrifuges
- 👉 Easy separation due to the single tube use
- 👉 Supplied with specific PRFM activators
- 👉 Highly concentrated Platelets 2 to 4x extraction by centrifugation
- 👉 Elimination of contamination, by adapting the enclosed system
- 👉 Easy identification of the Buffy coat layer by naked eye
- 👉 Gel separator minimizes RBC contamination
- 👉 High count of number of platelets recovered
